

## Take Your Business Mobile with Checkfront and Square

*Checkfront integrates with Square, a leading payment provider, to bring mobile payments to tour operators.*

**VICTORIA, BC - June 7th, 2017** - Today, Checkfront Inc, a leading provider of online booking solutions, announced their integration with Square. Through two direct integrations, suppliers can now use Square to accept payments from their guests either online or from their mobile device.

“Our aim from the beginning has always been to streamline the business systems of our suppliers so that they can spend more time doing what they love,” said Jason Morehouse, CEO of Checkfront. “We have already invested in developing a mobile app for Checkfront which encourages suppliers to accept and manage bookings on the go. Providing them with a solution that allows them to also take payments on the go became a top priority for us, and with Square our customers are empowered to step outside of the office, giving them more freedom and more adventure.”

The Checkfront and Square integration allows suppliers to process last minute reservations and up sells on the spot with the Square Reader. Payments are processed immediately and instantly synced right into their Checkfront dashboard, eliminating the need to track reservations and payments separately.

“We’re excited to work with Checkfront to give their businesses access to Square’s hardware and payments,” said Pankaj Bengani, Square’s Partnerships Lead. “We know how important it is to be able to manage reservations and payments anywhere and never miss out on a sale.”

With Square, all major credit card transactions online or in person are processed seamlessly and safely. From deposits as soon as the next business day, to PCI compliance, to Chargeback Protection, Square handles the details of your business securely.

“We are thrilled to offer Checkfront customers the opportunity to get back to interacting with their customers,” says Jason Morehouse. “Now they can manage most of their business without having to sit in front of a computer.”

### About Checkfront

Checkfront Inc is a unified booking management system to accept reservations, process payments, track customers, sign waivers and documents, and simplify complex pricing, seasonality and inventory requirements. With customers in over 128 countries, Checkfront has processed over \$2 billion in online bookings (USD).
